EMBER

Ember, is an innovative new profile solution, protected by a design right, that provides linear lighting for plinth boards and true-handless channels. Unlike conventional profiles that have a base and a cover, Edge, has a U-shaped channel that allows the Blade S or Blase S+ strips to simply push in.

This feature streamlines the installation process, as well as maximising the light output. Transportation and packaging logistics have also been carefully considered during the design process and instead of selling long lengths which are difficult to ship and prone to damage, the profile is available in 1-meter lengths that connect with a locking mechanism.

BENEFITS
• Simplified process for installing the LED flexible strip
• Suitable for use in two applications
• Less prone to damage in transit
• Easier to transport
• Registered design right: 6371780

KEY FEATURES
• U-shaped channel for simple push-fit installation of the LED flexible strip
• Unique locking mechanism allows 1-meter lengths to be joined together
• High quality 3M VHB (very high bond) adhesive tape for installation

TECHNICAL SPECIFICATION	
Material	Aluminium
Flexible Strip Compatibility (No VHB tape)	Blade S (No Tape) - WW - 5M - LLS033
	Blade S (No Tape) - NW - 5M - LLS034
	Blade S+ (No Tape) - CCT - 5M - LLS035
